

# AI Resume Analyzer - Project Documentation

## 1. Overview

This project is a web-based application that analyzes resumes in PDF format and provides skill detection, scoring, and suggestions.

## 2. Technologies Used

Python, Streamlit, PyPDF2

## 3. Features

- Upload PDF resume
- Extract text from resume
- Detect skills
- Calculate resume score
- Suggest missing skills

## 4. Working Process

1. User uploads resume
2. Text is extracted using PyPDF2
3. Skills are matched with predefined list
4. Score is calculated
5. Missing skills are suggested

## 5. Code Explanation

`extract_text()`: Extracts text from PDF

`analyze_resume()`: Finds skills and calculates score

`get_missing_skills()`: Suggests missing skills

## 6. Output

Displays resume score, detected skills, and missing skills.

## 7. Limitations

Works only with text-based PDFs. Scanned resumes may not work.

## 8. Future Enhancements

- Add NLP
- Job matching
- ATS scoring
